

BBT 9 Final Project (Summative Assessment)

VALUE: 30% of Semester Mark

1. Make a folder titled **HTML Final Project** in your named drive.
2. Home Page – Save as **Index.html** and have links to all other pages in your site.
3. 1 Page for each Module, each save as: module name.html example: word.html
 - A. If you did the Photo Story Module: you must include an original narration in your Photo Story Module page which will play when clicked.
 - B. If you did the Pivot Module: You must include an original animation in your Pivot Module page which will play when clicked.
4. 1 page about you.
5. 1 page that includes your favorite and least favorite module.
6. 1 image must have a border.
7. 1 Reference page with listed links to **all** sources.

Each HTML Page must contain the following:

- ✚ Title
- ✚ 1 Paragraph in your own words (5-7 sentences start with a Definition and Description)
- ✚ 1 Picture from the internet and one screen capture from your own activities
- ✚ 1 Horizontal Rule
- ✚ A Link back to your Index page
- ✚ Background on each page (color or image)

As a template for each page consider the following criteria:

- | | |
|----------------|--|
| 1. Definition | i.e., MS Word is a word processing software program that allows for the creation of documents |
| 2. Description | describe what activities you did and what you learned |
| 3. Example | i.e., place a picture and/or a screen capture of one of your activities with a short description |
| 4. Links | back to your index page and external links for more examples |

Tip:

Go to “My Computer” – then double click your drive – choose the tools tab – then click the View tab and uncheck the “Hide extensions for known file types” setting then select Accept. (This will ensure the file extensions are visible in case your computer adds an unwanted extension. i.e. *webpage.html.txt*)
